DIRECTIONS FOR USE

SOIL APPLICATIONS

Crop	Insect	Dosage
Hops	Hop Aphid	6.4 – 12.8 fl. oz./A (0.1 - 0.2 lb ai/A)
Apply one soil application of the specified dosage per acre in sufficient carrier to insure application using one of the following methods. <ol style="list-style-type: none">1. As a low pressure (drip) irrigation injection.2. As a subsurface sidedress shanked into the root zone on both sides of the plants.3. As a hill drench in sufficient water to insure incorporation into the root zone.		
Notes: <ul style="list-style-type: none">• For best results shank (sidedress) applications should be followed by furrow irrigation and hill drench applications by sprinkler irrigation.• Higher rate is recommended when extended residual control is needed.		
Restrictions: <ul style="list-style-type: none">• Make the soil application 60 or more days before harvest.• Regardless of the type of formulation (ADMIRE or PROVADO), do not apply more than 0.3 lb active ingredient of imidacloprid per acre per year.
